

IN THE CLAIMS

Please amend the claims as follows:

1-79. (Canceled)

80. (Currently Amended) A vacuum sealed package comprising:

a vacuum-sealed bag comprising a laminate, the laminate comprising an exterior portion and an interior portion, the interior portion having less than 1 ppm hexanal, wherein the laminate further comprises an oxygen barrier layer and a moisture barrier layer, further wherein the laminate has an oxygen permeability no greater than $0.13 \text{ cc}/100 \text{ ins.}^2$ $0.05 \text{ cc}/100 \text{ ins.}^2$ in about one day; and

frangible oat-based puffed cereal pieces having a shelf life and a crush resistance no less than ~~14.7 PSIA~~ 14.7 PSIA, the frangible oat-based puffed cereal pieces contained within the interior portion of the laminate, wherein rancidity of the frangible oat-based puffed cereal pieces is eliminated due to containment in the vacuum sealed package having the oxygen and moisture barrier layers, further wherein the shelf life of the frangible oat-based puffed cereal pieces is nearly doubled as compared with frangible oat-based puffed cereal pieces contained in a non vacuum-sealed bag, wherein vacuum-sealing reduces breakage of the frangible oat-based puffed cereal pieces contained within the vacuum-sealed bag, and allows the package to be filled with approximately 20 to 60% more frangible oat-based puffed cereal pieces.

81. (Currently Amended) The vacuum sealed package of claim 80 wherein the laminate has an oxygen permeability no greater than $0.05 \text{ cc}/100 \text{ ins.}^2$ $0.02 \text{ cc}/100 \text{ ins.}^2$ in about one day.

82. (Currently Amended) The vacuum sealed package of claim 80 wherein the laminate has an oxygen permeability no greater than $0.02 \text{ cc}/100 \text{ ins.}^2$ $0.013 \text{ cc}/100 \text{ ins.}^2$ in about one day.

83. (Previously Presented) The vacuum sealed package of claim 80 wherein the moisture barrier layer comprises a metallized polymeric composite.

84. (Previously Presented) The vacuum sealed package of claim 80 wherein the moisture barrier layer is a coating exterior of an oxygen barrier coating.

85. (Previously Presented) The vacuum sealed package of claim 80 wherein the vacuum-sealed bag is opaque.
